| <i>Introduction</i> .....                 | <i>xxi</i>  |

## **Chapter 1**    **Introducing Perl Basics** ..... 1

|  |    |
|--|----|
| <i>Accessing the Command-Line Arguments</i> .....        | 2  |
| <i>Checking File Attributes</i> .....                    | 3  |
| <i>Finding Patterns in a String</i> .....                | 5  |
| <i>Opening and Reading from a File</i> .....             | 7  |
| <i>Finding Lines Matching a Pattern in a File</i> .....  | 9  |
| <i>Storing and Accessing Data in an Array</i> .....      | 11 |
| <i>Storing and Accessing Data in a Hash</i> .....        | 13 |
| <i>Finding Array Elements Matching a Pattern</i> .....   | 16 |
| <i>Printing to a File</i> .....                          | 17 |
| <i>Using the Here Document</i> .....                     | 19 |
| <i>Using References and Nested Data Structures</i> ..... | 20 |
| <i>Obtaining References</i> .....                        | 21 |
| <i>Dereferencing</i> .....                               | 22 |
| <i>Using an Array of Arrays</i> .....                    | 23 |
| <i>Using a Hash of Arrays</i> .....                      | 24 |
| <i>Using an Array of Hashes</i> .....                    | 25 |
| <i>Using a Hash of Hashes</i> .....                      | 26 |
| <i>Working with Command-Line Utilities</i> .....         | 28 |
| <i>Summary</i> .....                                     | 29 |

## **Chapter 2**    **Working with Commonly Used Perl                   Modules** ..... 31

|   |    |
|---|----|
| <i>Using a Perl Module</i> .....                    | 33 |
| <i>Verifying the Installation of a Module</i> ..... | 33 |
| <i>Reviewing the Module Documentation</i> .....     | 34 |
| <i>Exporting Functions</i> .....                    | 35 |
| <i>Using a Module</i> .....                         | 36 |
| <i>For the Curious Minds: Learning More</i> .....   | 37 |

|   |    |
|---|----|
| <i>Getting Command-Line Arguments .....</i>                   | 37 |
| <i>Working with Dates and Times .....</i>                     | 40 |
| <i>Printing the Current Time as YYYY/MM/DD hh:mm:ss .....</i> | 42 |
| <i>Converting YYYY/MM/DD hh:mm:ss to Epoch Seconds .....</i>  | 43 |
| <i>Dumping a Perl Data Structure .....</i>                    | 44 |
| <i>Finding Network Shares .....</i>                           | 46 |
| <i>Enumerating Windows Domains and Machines .....</i>         | 49 |
| <i>Accessing the Windows Registry .....</i>                   | 52 |
| <i>Reading the Windows Event Logs .....</i>                   | 56 |
| <i>Checking the Status of the Windows Services .....</i>      | 60 |
| <i>Interacting with a COM Object .....</i>                    | 64 |
| <i>Translating a COM Object Model to Perl .....</i>           | 66 |
| <i>Scripting Database Creation via SQL-DMO .....</i>          | 67 |
| <i>Using Win32::OLE::Const .....</i>                          | 68 |
| <i>Accessing SQL Server via ODBC .....</i>                    | 69 |
| <i>Walking a Directory Tree .....</i>                         | 72 |
| <i>Sending SMTP Email Messages .....</i>                      | 75 |
| <i>Parsing Text According to a Grammar .....</i>              | 78 |
| <i>Introducing the Grammar .....</i>                          | 79 |
| <i>Adding Actions to the Grammar .....</i>                    | 82 |
| <i>Summary .....</i>  | 87 |

### **Chapter 3    *Working with Commonly Used Perl Routines* ..... 89**

|   |     |
|---|-----|
| <i>Reading from an Initialization File .....</i>                                    | 91  |
| <i>Reading from a Configuration File .....</i>                                      | 96  |
| <i>Checking If an Element Is in an Array .....</i>                                  | 99  |
| <i>Getting the Intersection of Two Arrays .....</i>                                 | 100 |
| <i>Getting the Difference Between Two Arrays .....</i>                              | 104 |
| <i>Checking If Two Arrays Contain the Same Elements...</i>                          | 105 |
| <i>Removing Duplicates from an Array .....</i>                                      | 105 |
| <i>Getting the Difference Between Two Time Strings....</i>                          | 107 |
| <i>Finding the Difference in Two T-SQL Scripts .....</i>                            | 110 |
| <i>Persisting a Data Structure to a File .....</i>                                  | 112 |
| <i>Reading from a Persisted Data Structure .....</i>                                | 115 |
| <i>Querying Data in SQL Server via ADO .....</i>                                    | 118 |
| <i>Executing a T-SQL Script via osql.exe .....</i>                                  | 124 |
| <i>Producing the Dependency Trees from the<br/>    Immediate Dependencies .....</i> | 127 |
| <i>Splitting a T-SQL Script into Individual Batches..</i>                           | 131 |

|  |     |
|--|-----|
| <i>Normalizing a T-SQL Script</i> .....                      | 133 |
| Using a Simple T-SQL Grammar .....                           | 138 |
| Understanding Actions in the Simple T-SQL Parser .....       | 139 |
| Normalizing a T-SQL Script .....                             | 141 |
| Restoring the Original T-SQL Code .....                      | 144 |
| <i>Implementing the Replace-Match-Restore Strategy</i> ..... | 144 |
| When Simple Search-and-Replace Doesn't Work .....            | 144 |
| Using the Replace-Match-Restore Strategy .....               | 145 |
| <i>Parsing Qualified Database Object Names</i> .....         | 146 |
| <i>Retrieving the Service Accounts</i> .....                 | 149 |
| <i>Scripting a Stored Procedure</i> .....                    | 150 |
| <i>Summary</i> .....   | 154 |

## **Chapter 4    Migrating Data** ..... 155

|  |     |
|--|-----|
| <i>Checking bcp Errors</i> .....   | 156 |
| Recording the bcp Command Line .....                                     | 160 |
| Parsing the bcp Command Line .....                                       | 160 |
| Capturing Three Categories of bcp Errors .....                           | 162 |
| Dealing with Special Cases .....   | 163 |
| Streamlining bcp and Error Checking .....                                | 163 |
| <i>Counting bcp Rows</i> .....   | 164 |
| <i>Comparing bcp Files</i> .....   | 168 |
| <i>Splitting Free-Form Text Phone Numbers</i> .....                      | 171 |
| <i>Importing SQL Server Errorlog</i> .....                               | 176 |
| <i>Validating Data Before Importing</i> .....                            | 179 |
| <i>Importing Performance Log into a Database</i> .....                   | 182 |
| <i>Exporting Performance Data to a File for</i><br><i>Charting</i> ..... | 187 |
| <i>Summary</i> .....   | 191 |

## **Chapter 5    Comparing and Sorting               Database Objects** ..... 193

|   |     |
|---|-----|
| <i>Comparing Object Schemas</i> .....                     | 193 |
| <i>Tracking and Sorting Object Dependencies</i> .....     | 194 |
| <i>Comparing the Columns Between Two Tables</i> .....     | 194 |
| <i>Comparing the Indexes Between Two Tables</i> .....     | 199 |
| <i>Comparing the Constraints Between Two Tables</i> ..... | 205 |
| Comparing DEFAULT Constraints .....                       | 206 |
| Comparing CHECK Constraints .....                         | 206 |
| Comparing Key Constraints .....                           | 207 |
| Using a Perl Script to Compare Constraints .....          | 208 |

|   |     |
|---|-----|
| <i>Comparing Two Stored Procedures</i> .....                | 214 |
| <i>Comparing the Schemas of Two Databases</i> .....         | 218 |
| Obtaining a List of Tables and Stored Procedures .....      | 219 |
| Comparing Databases .....                                   | 220 |
| Comparing Tables .....                                      | 222 |
| Using compareDBs.pl .....                                   | 223 |
| <i>Producing a Call Tree for a Stored Procedure</i> .....   | 224 |
| Scripting a Given Stored Procedure .....                    | 225 |
| Parsing for Stored Procedure Calls .....                    | 226 |
| Constructing the Call Tree .....                            | 229 |
| Putting It All Together .....                               | 231 |
| Finding the Call Trees for All the Stored Procedures .....  | 233 |
| Enhancing callTree.pl .....                                 | 234 |
| <i>Sorting Stored Procedures by Dependency</i> .....        | 235 |
| Representing the Immediate Dependencies .....               | 235 |
| Sorting the Stored Procedures .....                         | 238 |
| Finding the Immediate Dependencies .....                    | 240 |
| Normalizing Identifiers .....                               | 243 |
| Putting It All Together .....                               | 243 |
| <i>Sorting Stored Procedure Script Files by</i>             |     |
| <i>Dependency</i> .....                                     | 246 |
| <i>Producing a Reference Tree for a Table</i> .....         | 251 |
| <i>Summary</i> .....  | 254 |
| <br><b>Chapter 6   Analyzing Databases</b> .....            | 255 |
| <br><i>Converting a Byte-Swapped Hex String to the</i>      |     |
| <i>Page ID</i> .....  | 255 |
| <i>Finding the Row/Page Mapping</i> .....                   | 258 |
| Mapping from a Page to the Rows .....                       | 258 |
| Mapping from a Row to the Page .....                        | 262 |
| Reading the DBCC PAGE Output .....                          | 264 |
| Finding the Primary Key Columns .....                       | 266 |
| Retrieving the Rows from DBCC PAGE Output .....             | 267 |
| Mapping Between Rows and Pages .....                        | 270 |
| Observing Page Removals and Page Splits .....               | 275 |
| <i>Studying the SQL Server Storage Internals</i> .....      | 278 |
| Designing the Data Structure .....                          | 279 |
| Examining the Script for Studying SQL Server Data Pages ... | 281 |
| Studying the Behavior of the SQL Server Storage .....       | 289 |

|   |     |
|---|-----|
| <i>Studying Locking Behavior</i> .....                | 298 |
| Examining Tools for Monitoring Locking Behavior ..... | 298 |
| Using the Trace Flag 1200 .....                       | 299 |
| Making the Trace Flag 1200 More User Friendly .....   | 300 |
| Examining Locks Acquired by an Insert Statement ..... | 306 |
| Examining Locks Acquired by an Update Statement ..... | 308 |
| <i>Identifying Poorly Designed Indexes</i> .....      | 309 |
| <i>Finding Poorly Designed Constraints</i> .....      | 314 |
| <i>Finding Fragmented Indexes</i> .....               | 320 |
| <i>Summary</i> .....                                  | 326 |

## **Chapter 7   Analyzing SQL Code** .....329

|  |     |
|--|-----|
| <i>Cleaning Up Query Execution Plans for Analysis</i> .... | 330 |
| <i>Finding Excessive Joins</i> .....                       | 334 |
| <i>Finding Queries with Excessive Joins</i> .....          | 337 |
| <i>Summarizing Index Usage</i> .....                       | 341 |
| <i>Creating a Chart of Query Operators</i> .....           | 349 |
| <i>Finding Updates on the Clustered Index Keys</i> .....   | 354 |
| <i>Checking Stored Procedures for Violations of</i>        |     |
| <i>Coding Best Practices</i> .....                         | 360 |
| Checking for SELECT * .....                                | 368 |
| Checking for Dynamic SQL .....                             | 369 |
| Checking for Interleaved DDL and DML Statements .....      | 370 |
| <i>Checking for More Coding Standard Violations</i> .....  | 372 |
| Checking for SET NOCOUNT ON .....                          | 372 |
| Checking for ANSI_NULLS and QUOTED_IDENTIFIER              |     |
| Settings .....   | 374 |
| <i>Summary</i> .....                                       | 375 |

## **Chapter 8   Generating SQL Code** .....377

|   |     |
|---|-----|
| <i>Generating SQL from Configuration Options</i> .....  | 378 |
| <i>Generating SQL for Data Conversion</i> .....         | 384 |
| <i>Adding a DROP PROC Before Each CREATE PROC</i> ..... | 391 |
| <i>Stripping off Identifier Delimiters</i> .....        | 395 |
| <i>Handling the T-SQL Whitespace</i> .....              | 398 |
| <i>Capitalizing the T-SQL Reserved Words</i> .....      | 399 |
| <i>Changing Collations in a T-SQL Script</i> .....      | 401 |
| <i>Generating Audit Tables</i> .....                    | 403 |
| <i>Generating Audit Triggers</i> .....                  | 408 |

|  |     |
|--|-----|
| <i>Generating Data INSERT Statements</i> .....             | 413 |
| <i>Merging Multiple SQL Scripts into a Single File</i> ... | 419 |
| <i>Splitting a SQL Script File into Multiple Files</i> ... | 420 |
| <i>Scripting the Database Objects with SQL-DMO</i> .....   | 425 |
| <i>Summary</i> .....                                       | 430 |
| <br><b>Chapter 9 Analyzing Log Files</b> .....             | 431 |
| <br><i>Understanding Log Files</i> .....                   | 431 |
| Log Files Can Be Numerous .....                            | 431 |
| Log Files Can Be Large .....                               | 432 |
| Log Files Are a Goldmine .....                             | 433 |
| Using Tools for Analyzing Log Files .....                  | 433 |
| <i>Extracting Information from Windows Event Logs</i> .... | 434 |
| Using grepEventlog.pl .....                                | 438 |
| Examining grepEventlog.pl .....                            | 439 |
| <i>Extracting Information from ODBC Trace Logs</i> .....   | 442 |
| Text Patterns Containing SQL Queries .....                 | 442 |
| Extracting SQL Queries from ODBC Trace Logs .....          | 443 |
| <i>Summarizing Windows Event Logs</i> .....                | 445 |
| Deciding What to Summarize .....                           | 448 |
| Deciding What to Configure .....                           | 449 |
| Looking More Closely at the Script eventLogSummary.pl ...  | 451 |
| Examining a Sample Event Log Summary .....                 | 456 |
| Improving eventLogSummary.pl .....                         | 458 |
| <i>Scanning for TCP Ports Used by SQL Server</i> .....     | 458 |
| <i>Summarizing Reboot History</i> .....                    | 462 |
| <i>Summarizing SQL Server Errorlogs</i> .....              | 465 |
| Dissecting the SQL Server Errorlog .....                   | 466 |
| Examining the Anatomy of an Errorlog Entry .....           | 467 |
| Creating a Script for Summarizing Errorlogs .....          | 468 |
| Setting Configuration Options .....                        | 478 |
| Examining the Structure of errorlogSummary.pl .....        | 480 |
| Examining a Sample Errorlog Summary Report .....           | 482 |
| Beyond Summarizing Errorlogs .....                         | 484 |
| <i>Checking Transaction Log Backup Chains</i> .....        | 485 |
| <i>Analyzing Deadlock Traces</i> .....                     | 491 |
| Dissecting Deadlock Trace Records .....                    | 493 |
| Analyzing Deadlock Chains .....                            | 494 |
| More on the Script deadlockSummary.pl .....                | 500 |
| <i>Summary</i> .....                                       | 504 |

|   |     |
|---|-----|
| <b>Chapter 10 Managing SQL Server Security</b>                              | 505 |
| <i>Listing Sysadmin Accounts and Logins</i>                                 | 506 |
| <i>Finding SQL Server Machines</i>  | 514 |
| <i>Scanning for Null sa Passwords</i>                                       | 519 |
| <i>Tracking SQL Server Service Accounts</i>                                 | 524 |
| Introducing the Hash \$configRef for the Configuration Options              | 530 |
| Introducing the Hashes \$currentRef and \$savedRef for the Service Accounts | 531 |
| Introducing the Hash \$diffRef for the Service Accounts Difference          | 532 |
| There's More Than One Way to Retrieve Service Accounts                      | 533 |
| Managing Service Accounts in a Large Enterprise                             | 534 |
| <i>Alerting Security Changes</i>  | 535 |
| <i>Summarizing SQL Server Login Audits</i>                                  | 548 |
| <i>Identifying Wide-Open Shares</i>   | 556 |
| <i>Summary</i>  | 559 |
| <br><b>Chapter 11 Monitoring SQL Servers</b>                                | 561 |
| <i>Monitoring SQL Server Errorlogs:</i>                                     |     |
| <i>The Basic Version</i>  | 564 |
| Monitoring an Errorlog  | 565 |
| Examining the alertErrorlog.pl Script                                       | 567 |
| Introducing the Status Data Structure                                       | 572 |
| Meeting the Monitoring Requirements   | 576 |
| <i>Monitoring SQL Server Errorlogs:</i>                                     |     |
| <i>The Robust Version</i>   | 577 |
| Investigating the Drawbacks of the Script alertErrorlog.pl                  | 577 |
| Building a More Versatile and Robust Script for Monitoring Errorlogs        | 578 |
| Choosing What to Monitor  | 590 |
| Setting the Configuration Options   | 593 |
| Examining the Flow of the Script  | 599 |
| Understanding the Two Key Data Structures                                   | 600 |
| Understanding Pattern-Matched Exceptions                                    | 605 |
| Customizing the Script monitorErrorlogs.pl                                  | 607 |
| <i>Monitoring Drive Space Shortage</i>                                      | 609 |
| <i>Monitoring Availability: The Basic Version</i>                           | 613 |
| <i>Monitoring Availability: The Robust Version</i>                          | 622 |
| Improving the Availability Monitoring                                       | 622 |
| Creating a Robust Script for Monitoring Availability                        | 623 |
| Examining the Script monitorAvailability.pl                                 | 634 |

|  |     |
|--|-----|
| <i>Monitoring SQL Server Cluster:</i>                        |     |
| <i>The Basic Version</i> .....                               | 637 |
| Monitoring the Cluster Events .....                          | 638 |
| Choosing a Tool to Monitor the Cluster .....                 | 638 |
| Creating a Script to Monitor the Cluster Events .....        | 640 |
| Studying the Cluster Alert Script .....                      | 645 |
| <i>Monitoring SQL Server Clusters:</i>                       |     |
| <i>The Robust Version</i> .....                              | 649 |
| Improving SQL Server Cluster Monitoring .....                | 649 |
| Creating a Script to Monitor Multiple SQL Server Clusters .. | 650 |
| Studying the Script monitorClusters.pl .....                 | 659 |
| <i>Summary</i> .....   | 661 |

## **Chapter 12 Managing SQL Servers in the Enterprise** .....663

|  |     |
|--|-----|
| <i>Running Queries on Multiple Servers</i> .....           | 665 |
| Finding a Database .....                                   | 668 |
| Finding SQL Server Instances with Old Service Packs .....  | 669 |
| Finding Null Passwords for SQL Server Logins .....         | 670 |
| Finding Information About a Database .....                 | 671 |
| Finding the Missing Database Backups .....                 | 671 |
| <i>Finding the Configured SQL Server TCP Ports</i> .....   | 672 |
| <i>Finding SQL Server Errorlogs</i> .....                  | 676 |
| <i>Obtaining Server Information with srvinfo.exe</i> ..... | 679 |
| Finding the System Up Time .....                           | 685 |
| Finding the Status of All the SQL Server Services .....    | 685 |
| Finding the Domains of All the SQL Servers .....           | 686 |
| Finding Information About All the Drives .....             | 686 |
| <i>Finding the Memory Configurations</i> .....             | 687 |
| <i>Archiving the SQL Server System Tables</i> .....        | 691 |
| <i>Archiving the SQL Server Registry Entries</i> .....     | 700 |
| <i>Purging Old Obsolete Backup Files</i> .....             | 704 |
| <i>Summary</i> .....                                       | 711 |

## **Appendix A Perl Resources** .....713

|  |     |
|--|-----|
| <i>Perl Online Documentation</i> .....                     | 713 |
| <i>Perl Books</i> .....                                    | 714 |
| <i>Perl Web Sites, Mailing Lists, and Newsgroups</i> ..... | 716 |
| <i>Perl Modules</i> .....                                  | 717 |

|   |         |
|---|---------|
| <b>Appendix B Getting Started with Perl</b>     | 721     |
| <i>Installing Perl</i>                          | 721     |
| <i>Running Perl Scripts</i>                     | 722     |
| <i>Getting to Know the Perl Bare Essentials</i> | 724     |
| Introducing Values, Data Types, and Variables   | 724     |
| Understanding Scalars, Arrays, and Hashes       | 725     |
| Understanding Scalar Context and List Context   | 729     |
| Determining True or False                       | 730     |
| Grouping Statements into Code Blocks            | 731     |
| Creating Compound Statements                    | 732     |
| Declaring Variables                             | 734     |
| Comparing Values                                | 735     |
| Interpolating Variables                         | 736     |
| Using Functions or Routines                     | 736     |
| Quoting Strings                                 | 739     |
| Understanding References                        | 740     |
| <i>Introducing Perl Regular Expressions</i>     | 743     |
| Using Regular Expressions                       | 743     |
| Writing Simple Regular Expressions              | 744     |
| Composing Complex Regular Expressions           | 748     |
| Using More Advanced Features                    | 753     |
| <i>Summary</i>                                  | 756     |
| <br><b>Index</b>                                | <br>757 |
